PROFESSIONAL PROFILE

Motivated BSc (Hons) Computing with AI student with hands-on academic project experience in Android mobile development, Java desktop applications, databases, and machine learning. Comfortable working across frontend, backend, database integration, UI prototyping, GitHub collaboration, debugging, and Scrum-based delivery. Known for taking ownership in student teams as Scrum Master, maintaining sprint documents, managing merges, and helping projects move from prototype to tested implementation.

TECHNICAL SKILLS

Programming	Java, Python, C, Kotlin
Mobile & Backend	Android Studio, Kotlin, Firebase Authentication, Firebase Realtime Database, MVVM structure
Desktop & Web	Java Swing, Apache NetBeans, Tkinter, HTML, CSS, JavaScript
Databases	MySQL, SQLite3, Firebase, ERD design, normalization, SQL queries
Data / AI	Pandas, NumPy, Matplotlib, scikit-learn, EDA, Multiple Linear Regression, model evaluation
Agile & Git	Scrum, sprint planning, stand-ups, sprint reviews, retrospectives, Trello, Microsoft Teams, Git, GitHub, branching, merges, conflict resolution
Design & Media	Canva, Figma, draw.io, basic photo editing, basic video editing

EDUCATION

BSc (Hons) Computing with Artificial Intelligence

Softwarica College of IT and E-Commerce | Coventry University (UK), Dillibazar, Kathmandu | *Currently Semester 4 | 2024 - Present*

Higher Secondary Education (+2 Management)

Balmiki Education Foundation, Birtamode-1, Jhapa | *Grade 11 - 12*

Secondary Education (SEE)

Bibhuti Vidya Mandir, Bhadrapur-10, Jhapa | *Grade 5 - 10*

SELECTED ACADEMIC PROJECTS

PetPoint - Pet Care Mobile Application | Kotlin, Firebase, Android, MVVM | [GitHub](#)

- Built modules for pet shopping, veterinarian search, and lost-and-found pet reporting for users in Nepal.
- Implemented Firebase-based authentication, role-based redirection, dynamic splash/session handling, product management, shopping cart, checkout logic, stock updates, logout, delete account, and profile improvements.
- Served as Scrum Master: maintained Trello tasks, product backlog, sprint backlog, Excel project logs, Teams meetings, sprint planning, reviews, and retrospectives.
- Managed GitHub workflow including branches, pulls, merges, merge conflict discussions, and stable development-to-main integration.
- Performed debugging and testing across frontend/backend features, including bugs in own modules and support for teammates when needed.

BuySmart - E-Commerce Desktop Application | Java, Java Swing, Apache NetBeans, MySQL, MVC/DAO | [GitHub](#)

- Developed a desktop e-commerce application with buyer/seller roles, product listing, product management, cart, checkout simulation, order history, account deletion, and forgot-password OTP flow.
- Designed database structure using ERD concepts and connected Java application logic with a MySQL backend using a layered MVC / DAO approach.
- Used Figma, Canva, draw.io, Trello, GitHub, Teams, and testing documentation during the project lifecycle.

Nepal Tourism Revenue Predictor | Python, Pandas, scikit-learn, Multiple Linear Regression | [GitHub](#)

- Built a machine learning model to predict Nepal tourism foreign exchange earnings using Indian arrivals, third-country arrivals, and USD-NPR exchange rate data.
- Cleaned and merged datasets, performed EDA, trained two regression models, compared full-data vs non-COVID structures, and evaluated MAE, RMSE, and R-squared.
- Created a simple command-line prediction interface to estimate tourism revenue from user input values.

ADDITIONAL PROJECTS

To-Do List Application | Python, Tkinter, SQLite3 | [GitHub](#)

- Developed the main task-management module with CRUD operations: add, view, edit, delete, and mark tasks as complete.
- Built both frontend and backend using Tkinter and SQLite3, including calendar-based deadline selection, upcoming/overdue task status, and interactive UI elements.
- Contributed to team leadership by assigning work, conducting meetings, resolving workflow conflicts, and using GitHub for version control.

Database System and Data Visualization Coursework | MySQL, Python, Pandas, Matplotlib

- Created ER diagrams and normalized database tables through 1NF, 2NF, and 3NF concepts.
- Wrote SQL statements for table creation, inserts, updates, deletes, joins, aggregation, ordering, and filtering.
- Used Python libraries to clean data and create bar graphs, line graphs, histograms, and pie charts.

Networking / OSI Model Documentation | Research, Canva, Technical Writing

- Prepared structured technical documentation explaining the seven OSI layers, data flow, advantages, limitations, and networking concepts.
- Used Canva for visual presentation and developed clearer technical writing around networking fundamentals.

LEADERSHIP, COLLABORATION & DEBUGGING

- Scrum Master experience across multiple academic projects, including sprint planning, daily stand-ups, sprint reviews, retrospectives, task assignment, and progress tracking.
- Maintained Trello boards, sprint backlog, product backlog, meeting schedules, release plans, burndown charts, and Excel-based project documentation.
- Managed GitHub collaboration using individual branches, development branch, main branch, pull/latest-code practices, merges, merge conflict handling, and stable release updates.
- Regularly debugged issues across UI, authentication, database synchronization, cart logic, stock management, role-based access, and multi-feature integration.
- Comfortable presenting project progress through documentation, screenshots, diagrams, YouTube demos, and academic reports.

LANGUAGES & PERSONAL DETAILS

Languages: Nepali - Native | English - Proficient

Personal: Nationality: Nepali | Date of Birth: 2006 | Address: Kathmandu, Nepal
